

# Sand Cleaning Solutions

## Big Marlin – for 4WD tractors (80-100Hp) equipped with lifter and hydraulic joints

The Big Marlin is Tractor towed beach cleaning machine perfect for cleaning large sand areas.

The Big Marlin used a force fed system where a front blade is lowered into the sand by the operator within the tractor using the hydraulic lifter. The sand is forced onto a high frequency vibrating screen, which is then sifted to separate the waste materials from the sand. The sand falls through the mesh while the waste is forced up the screen into a practical steel the waste basket which can be emptied hydraulically.

Capable of cleaning both wet and dry sand, the depth of clean can be adjusted easily by the operator

### Technical Specifications:

- Completely hot dipped galvanized
- 3 point linkage suitable for 4WD Tractors with Hydraulic lifter
- Waste box: 500ltr, hydraulic lifting / emptying device of the hopper up to **2 metres** above the ground
- Cleaning Depth: 0–20cm adjustable by operator
- Cleaning width: 190 cm
- 2 easy interchangeable screens, 8mm and 12mm mesh sizes with 1 propeller shaft
- **Dimensions:** : 197x213x153cm (H) Weight: 635kg
- Cleaning capacity: 7,000 – 15,000m<sup>2</sup> per hour depending on the tractors speed, and the sand conditions, depth of clean and quality of finish required.
