

Sand Cleaning Solutions

Ondina walk behind sand cleaning machine

Small size walk-behind beach cleaning machine is ideal for cleaning of sandy areas such as beaches, golf course bunkers, playgrounds and beach volley courts.

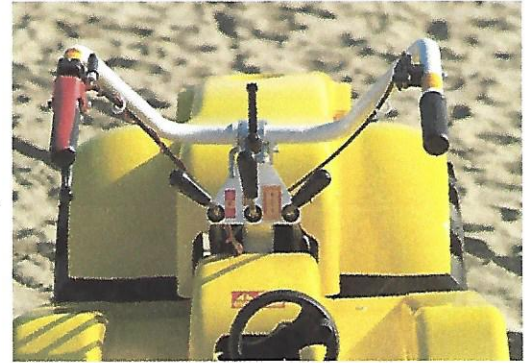

Rear vibrating screen system with interchangeable sieves, separating the waste which falls into practical steel container, extractable.

The depth of the work can be controlled by the operator using a steering wheel during operation.

The machine is supplied with 2 strong sieves with different meshes.

The machine is equipped with a locking device of the differential, activated by a lever.

The machine is very manoeuvrable by utilising independent brakes on each wheel

Technical Specifications:

- Completely hot dipped galvanised
- Cleaning width: 750mm
- Cleaning Depth: 0–100mm by operator
- 2 interchangeable sieves with different mesh sizes
- **Engine:** Honda GX160 6.5Hp (4.3Kw)
- Cleaning depth: 0 – 120mm
- Cleaning capacity: 1250 – 2800m² per hour
- Mechanical Transmission: two speeds in both forward and reverse
